IN THE SPECIFICATION:

Please replace the paragraph at page 9, lines 13-15, with the following amended paragraph.

--This first network 1 can itself be connected to a second network 2 which also includes a certain number of computers 20, 21, 22 <u>connected together by a network 26</u>, and printers 23, 24 as processing peripherals.--

Please replace the paragraph at page 16, lines 22-27, with the following amended paragraph.

--The following step [[S6]] <u>S7</u> is the step of testing the context of the processing ~~characterised~~ <u>characterized</u> by the context data obtained at the previous step. As explained previously, the context is tested with respect to the predetermined conditions 43 (hereinafter referred to by the expression "context conditions") which relate to the content of the computer document and/or to the functional characteristics of the peripheral.--
